-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 11, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Bienek (U.S. Patent No. 5,802,670). With respect to claim 1, Bienek discloses a door closer comprising a closer casing with first and second end portions, a pivot unit (24) including a pivot axle (24) with a drive end portion (in 17) and a coupling end portion (connected to member adjacent to housing 18, not shown in drawings). Bienek also discloses a cam member (17) and a cam follower (31). A length variable damping cylinder (portion encased by spring 1) disposed in the casing (18) having one end coupled to the cam follower (at 19) and an opposite end anchored to the second end portion of the casing (18). The damping cylinder accumulates a restoring force upon movement of the cam follower member from the closing position to the open position and releases the restoring force to assist movement of the cam follower from the open position back to the closing position.

3. With respect to claims 11 and 12, Bienek discloses the cam member (17) to be eccentric with respect to the pivot axle and to include a pair of plates (above and below 17, not shown in drawings) and a plurality of connecting studs (28, 30) that inter connect the plates and are acted upon by the cam member (17). The cam member includes a periphery with a positioning notch

(portion of 17 abutting 30, in figure 2, and abutting 28 in figure 3) engaging one of the connecting studs (28 or 30) at the open position.

Allowable Subject Matter

4. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references are cited to further show the state of the art with respect to cam actuated closing mechanisms: Bejarano et al, Watabe, Tillmann et al, Brown, Chen, and Park et al.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Kyle whose telephone number is 571-272-7057. The examiner can normally be reached on Monday - Friday, 8:30 am - 5:00 pm.

7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
